Name:	Class:		Date:
Midterm	Review sheet #2		
Multiple (Identify the	C hoice e letter of the choice that best completes th	he statei	nent or answers the question.
1.	Funguslike protists a. are consumers or decomposers. b. are made of chains of cells called hypl c. are divided into four major groups. d. are always parasites.	nae.	
2.	Fungia. are producers.b. cannot eat or engulf food.	c. d.	are found only in the soil. are primarily single-celled.
3.	Animal-like protistsa. are also known as protozoa.b. include amoebas and Paramecium.	c. d.	may move and be free-living or parasition. All of the above
4.	All protists area. eukaryotic.b. single-celled organisms.	c. d.	producers. consumers.
5.	Almost all algae live a. in dry, warm places. b. in cool, shady places.	c. d.	
6.	Phytoplankton are a. single-celled algae. b. water molds.	c. d.	amoebas. flagellates.
7.	Most of the world's oxygen is produced by a. protozoa. b. fungi.	c. d.	lichens. phytoplankton.
8.	Flagella are used by some algae to a. carry out photosynthesis. b. move through water.	c. d.	obtain oxygen. capture food.
9.	The shape of an amoeba is a. spherical. b. spiral.	c. d.	cylindrical. changing constantly.
10.	The word <i>pseudopodia</i> means a. "jellylike." b. "false feet."	c. d.	"whips." "propellers."
11.	The best known protist that moves by cilia a. <i>Giardia</i> . b. <i>Paramecium</i> .		Euglena. Volvox.

ID: A

1

endoplasmic reticulum

contractile vacuole.

____ 12. The functions of a ciliate's cell are controlled by the

a. cilia.

b. nucleus.

Name:

ID: A

a. mycelium. b. flagellum. c. basidium. b. flagellum. d. sporangium. 14. Black bread mold is an example of a(n) a. threadlike fungus. b. sac fungus. d. imperfect fungus. 15. Yeast is an example of a(n) a. threadlike fungus. c. club fungus. b. sac fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
14. Black bread mold is an example of a(n) a. threadlike fungus. b. sac fungus. d. imperfect fungus. 15. Yeast is an example of a(n) a. threadlike fungus. c. club fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. c. asexually using the lytic cycle. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton b. red alga c. contractile vacuoles. b. flagella. c. contractile vacuoles. b. flagella. c. asexually by fission. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
a. threadlike fungus. b. sac fungus. d. imperfect fungus. 15. Yeast is an example of a(n) a. threadlike fungus. b. sac fungus. c. club fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. c. asexually using the lytic cycle. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. c. asexually by fission. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
a. threadlike fungus. b. sac fungus. d. imperfect fungus. 15. Yeast is an example of a(n) a. threadlike fungus. b. sac fungus. c. club fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. c. asexually using the lytic cycle. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. c. asexually by fission. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
b. sac fungus. 15. Yeast is an example of a(n) a. threadlike fungus. b. sac fungus. c. club fungus. d. imperfect fungus. b. sac fungus. c. club fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. d. asexually using the lytic cycle. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton d. brown alga 19. Amoebas move with a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
15. Yeast is an example of a(n) a. threadlike fungus. b. sac fungus. d. imperfect fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. c. asexually using the lytic cycle. b. asexually by fission. d. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus b. sac fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
a. threadlike fungus. b. sac fungus. d. imperfect fungus. ———————————————————————————————————
b. sac fungus. 16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. c. asexually by budding. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. c. asexually by fission. b. asexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
16. Yeasts reproduce a. sexually by conjugation. b. asexually by fission. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus b. sac fungus c. lichen d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga b. red alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
a. sexually by conjugation. b. asexually by fission. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus b. sac fungus c. lichen c. lichen c. lichen d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
b. asexually by fission. 17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus b. sac fungus c. lichen d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
17. The mushrooms that you buy in the store or order on your pizza are examples of a. club fungus c. lichen b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
a. club fungus b. sac fungus d. threadlike fungus 18. Volvox is a that grows in round colonies. a. green alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike Euglena reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
b. sac fungus 18. Volvox is a that grows in round colonies. a. green alga
18. Volvox is a that grows in round colonies. a. green alga
a. green alga b. red alga c. phytoplankton b. red alga d. brown alga 19. Amoebas move with a. pseudopodia. b. flagella. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
b. red alga 19. Amoebas move with a. pseudopodia. b. flagella. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. b. asexually using the lytic cycle. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. brown alga d. contractile vacuoles. d. cilia. c. asexually by fission. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
19. Amoebas move with a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
a. pseudopodia. c. contractile vacuoles. b. flagella. d. cilia. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
b. flagella. 20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. c. asexually by fission. b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
20. Both animal-like amoebas and plantlike <i>Euglena</i> reproduce a. sexually. b. asexually using the lytic cycle. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae c. Cilia d. Flagella
a. sexually. b. asexually using the lytic cycle. c. asexually by fission. b. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia b. Hyphae d. Flagella
b. asexually using the lytic cycle. d. by conjugation. 21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
21 are fungal filaments that are similar to plant roots. a. Mycelia c. Cilia b. Hyphae d. Flagella
a. Mycelia c. Cilia b. Hyphae d. Flagella
b. Hyphae d. Flagella
22. The umbrella-shaped mushrooms that suddenly appear on your lawn are an example of
a. threadlike fungi. c. club fungi.
b. sac fungi. d. imperfect fungi.
23. A pine tree is a member of the kingdom
a. Animalia. c. Fungi.
b. Protista. d. Plantae.
24. Some members of the kingdom Protista
a. have flagella. c. are mushrooms.
b. are bacterial organisms. d. have no nucleus.
25. Plantae, Animalia, and Protista are all names of
a. kingdoms. c. classes.
b. phyla. d. genera.
