WORDLE www.wordle.net

Word clouds give greater prominence to words that appear more frequently in the source text. You can tweak your clouds with different fonts, layouts, and color schemes. The images you create with Wordle are yours to use however you like. You can print them out, or save them to the Wordle gallery to share with your friends.

If you don't want to print your Wordle immediately, you can "print" a pdf of it, or the best way to "save" your wordle is: right after you create it, do a "print screen" and paste it into paint, then use the select tool and select only the part you want, then click "cut. Close paint and don't save. Reopen paint and use the "paste" command and the image you "cut" will appear. Save it as a jpg (use the drop down menu & select jpg)!
